

# ACVS INDIA 2017

In Partnership with  
tct2017

ACVS INDIA 2017 PROGRAMME, HALL -A 18<sup>th</sup> August 2017, HICC, HYDERABAD.

08:00-08:30		<b>Introduction &amp; Welcome - ACVS Musical Extravaganza</b>
08:30-09:30		<b>Live Case I &amp; II</b>
09:30 - 9:40		<b>What to expect at ACVS 2017</b>
09:40 - 10:00		<b>Left Main Conclave</b>
9:40-9:50		EXCEL and NOBLE trials - Are the results really opposing?
9:50-10:00		Techniques for left main bifurcation stenting - Tips and Tricks
10:00-10:30		<b>Debate 1</b>
		<b>Left main bifurcation - With advanced technique and imaging PCI is the way to go irrespective of SYNTAX Score</b>
10:00-10:10		Pro
10:10-10:20		Con
10:20-10:22		Rebuttal
10:22-10:24		Rebuttal
10:30-11:30		<b>Left Main Practicals: Fire Walk with Me</b>
10:30-10:38		left main stenting with rotational atherectomy
10:38-10:46		Left main CTO recanalization
10:46-10:52		Stent overlap @ left main
10:52-11:00		IVUS / FFR for Left Main
11:00-11:08		Left main as sole surviving artery
11:08-11:16		Left main thrombus
11:16-11:26		Wrap up - How I do my left main case
11:30-1:00		<b>VALVE SUMMIT</b>
11.30-12:00		<b>Transcatheter Valve Therapies Update in 2017</b>
12:00-12:15		Longevity of trans-catheter and surgical valves
12:15-12:30		TAVI in Rheumatic /Bicuspid aortic valves?
12:30-12:45		TAVR - Minimalist Approach - Gimmick vs. Unmet Need
12:45-13:00		SAVR & Other cardiac Surgeries with minimal incision
13:00-14:00		<b>Live Case III &amp; IV</b>
14:00-15:00		<b>Valve / Structural Heart Disease Practicals - Mulholland Drive</b>
14:00-14:08		Coronary obstruction of displaced prosthesis during TAVI

14:08-14:16		Aortic dissection / rupture during TAVI
14:16-14:24		VSD / LVOT obstruction / mitral valve obstruction following TAVI-
14:24-14:32		TAVR - Vascular complications -
14:32-14:40		Difficult septal puncture / LV entry / Failure to deflate balloon after BMV
14:40-14:50		Wrap Up - Tips and tricks for structural heart disease
<b>15:00-16:45</b>		<b>Trials to Know - Eyes Wide Shut -</b>
15:00-15:10		SURTAVI
15:10-15:20		DECISION CTO
15:20-15:30		TOPIC
15:30-16.15		Future of Cardiology - Ten New Innovations
16.15-16.30		PIONEER AF PCI
16:30-16:45		BIG DATA in Interventional Cardiology
<b>16.45-17.30</b>		<b>Live Case V &amp; VI</b>
<b>17.30-19.30</b>		<b>Endovascular Summit</b>
17.30-17.45		What is new in Endovascular Interventions in 2017
17.45-18.00		Endovascular Rx for pulmonary hypertension
18.00-18.15		Choice of hardware - does it matter anymore?
18.15-18.30		How important is it to assess the arch & ascending aorta in patients with type 2 & 3 aortic dissections
18.00-18.15		Hybrid Approach Surgeries are Durable - Data review & indian Experience
18.15-18.30		Open repairs are still the gold standard in the Endovascular Era
18:30-18:40		Low Profile device is it such a big deal? -
18:40-18:50		Short neck AAA -Are we justified in treating by standard evar?
18.50-19.00		Endovascular interventions in 2025 - what can we expect ?
19.30 Onwards		Inauguration foll. by Cultural Program & Dinner.
<b>DAY 2- 19<sup>th</sup> AUGUST 2017</b>		
<b>08:00-09:00</b>		<b>Complications in Cath Lab Practicals - Apocalypse Now</b>
8:00-8:08		Embolizations and retrievals
8:08-8:16		Left main stent Embolisation
8:16-8:24		Intramural hematoma in left main
<b>8:30-9.00</b>		<b>Evolution of PCI - From Gruentzig(POBA) to BMS , DES &amp; BVS</b>
<b>09:00-10:00</b>		<b>Live Case VII &amp; VIII</b>
<b>10:00-11:00</b>		<b>Bifurcation Conclave - Search for Perfection</b>
10:00-10:12		How is bifurcation stenting different?
10:12-10:24		Bifurcation with radial approach

10:24-10:36		Bifurcation with BRS
10:36-10:48		Dedicated bifurcation stents - Is there any future?
<b>11:00-12:00</b>		<b>Bifurcation Practicals - Wild at Heart</b>
11:00-11:08		Bifurcation lesions in hemodynamically unstable patient
11:08-11:16		Bifurcation stenting in setting of primary PCI -
11:16-11:24		Left main cardiogenic shock, distal bifurcation
11:24-11:32		Dedicated bifurcation stent case eggs
11:32-11:40		Bifurcation with calcific lesions
11:40-11:50		Wrap Up - Management of complex bifurcation.
<b>12:00-13:00</b>		<b>Live Case IX &amp; X</b>
<b>13:00-14:00</b>		<b>CTO Conclave - Technique Demystified</b>
		Chairpersons
13:00-13:12		Hardware for CTO -
13:12-13:24		Hybrid Approach for CTO PCI - how to choose
13:24-13:36		Retrograde CTO utilising parallel stenting & reverse CART
13:36-13:48		Emerging role of Imaging in CTO Intervention ' pre and per
<b>14:00-15:00</b>		<b>Cardio-Diabetology&amp; Prevention</b>
14:00-14:15		High Intensity Statin Therapy - Review & Implications of Latest Guidelines
14:15-14:30		PCSK9 Inhibitors - A Paradigm shift in Lipid Management
14:30-14:45		Role of Sulphonyl ureas in current day context- with special focus on CV safety
14:45-15:00		Canvass Study - Canagliflozin - CV & Renal Events in Diabetes Mellitus
<b>15:00-16:00</b>		<b>Heart Failure &amp; Device Update</b>
15:00-15:15		ARNI - Is it a new magic kid in Heart failure Management
15:15-15:30		How can i identify the patient who will benefit the most from an ICD (1.5P)
15:30-15:45		Prevalence & Incidence of SCD - an Indian Insight
15:45-16:00		Which is the preferred device in my patient - ICD-SC, ICD-DC or CRTD - Case Based
<b>16:00-17:00</b>		<b>Live Case XI &amp; XII</b>
<b>17:00-18:00</b>		<b>Complex Interventions Practicals - Fear and Desire</b>
17:00-17:08		SVG / LIMA interventions
17:08-17:16		PCI on patient undergoing CPR
17:16-17:24		STEMI in calcific artery
17:24-17:32		Impella Success & Regrets Cases
17:32-17:40		Rota burr stall / entrapment / slow flow/ Rota in a dissected / prior stent artery
17:40-17:50		Wrap Up - How to use rotablation in complex lesions-
<b>18.00- 19.00</b>		<b>Live Case XIII &amp; XIV</b>

19.00- 20.00		<b>Personality Development Talk</b>
<b>DAY-3, 20<sup>th</sup> AUGUST 2017.</b>		
<b>08:00-09:00</b>		<b>Miscellaneous Practicals - Inland Empire</b>
8:00-8:08		Complications after radial PCI
8:08-8:16		PCI in renal insufficiency
8:16-8:24		Scaffold fracture after BRS implantation
8:24-8:32		Aneurysm formation / Positive remodelling after DES implantation-
8:32-8:40		Very late complication after DES
8:40-8:48		Lesions @ bends
8:48-8:58		BVS in difficult anatomy and different clinical scenarios
<b>09:00-10:00</b>		<b>Live Case XV &amp; XVI</b>
		QFR - New method calculation of FFR in cath lab without wire
<b>10:00-11:00</b>		<b>What is new in Imaging / FFR - A Clockwork Orange</b>
		Imaging for TAVI procedure
		Imaging for LAA Closure
		FFR Ct - what is new & where are we now
		IFR FFR discordance, what do DEFINE FLAIR / IFR SWEDEHEART tell us? -
<b>11:00-11:30</b>		<b>Debate 4</b>
		<b>Stable STEMI presenting 24 hours after onset of ischemia</b>
11:00-11:10		I straight away take to cath lab with intention to open up the artery
11:10-10:10		I beg your pardon - I go for assessment of ischemia before venturing towards cath lab
11:20-11:22		Rebuttal - 1
11:22-11:24		Rebuttal - 2
<b>11:30-12:00</b>		<b>Debate 5 - Clopidogrel pre-treatment versus Prasugrel / Ticagrelor for planned PCI</b>
		Pro
		Con
<b>12:00-13:00</b>		<b>Live Case XVII &amp; XVIII</b>
<b>13:00-13:30</b>		<b>Cases by Masters -</b>
		Full Metal Jacket
		Case with a twist
		Complex PCI
		Complex PCI
		Wrap up - How I manage complex lesions
<b>13:30-14:00</b>		<b>Pearls from this conference</b>

<b>14:00</b>		<b>Valedictory</b>
